

PROGETTO AMREF LINK TO SCHOOL
Un progetto di gemellaggio fra scuole italiane e del Kenya
a.s. 2018/2019
Classe I D

We are a class of the lower secondary school in Rome.
This year we have joined the LINK TO SCHOOL project
with our teacher

We have studied Africa and the main features of this Continent

Each of us drew the outline of an African State on paper and printed a photo of the same State

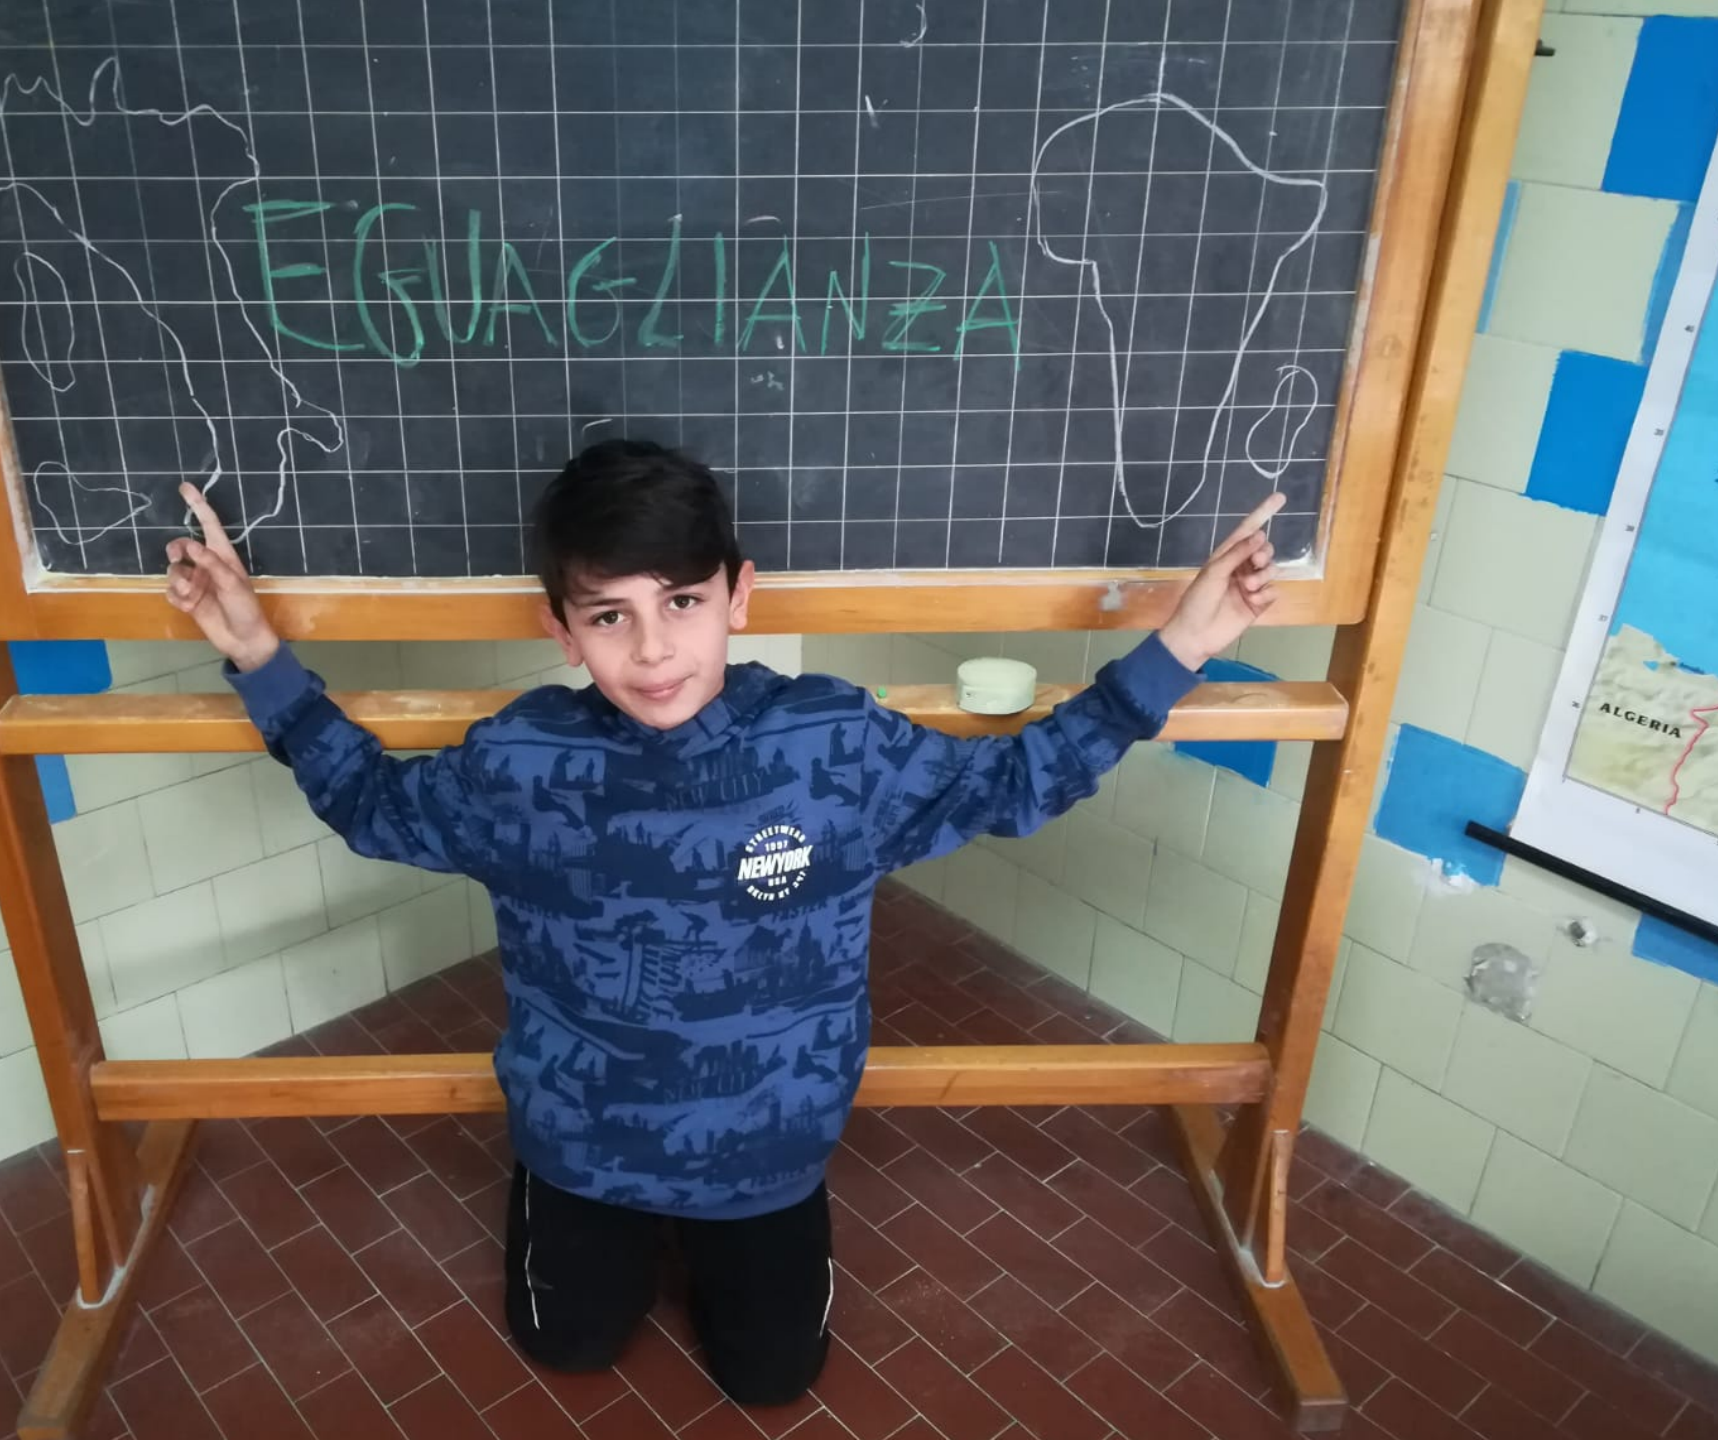

In our classroom we all played together. Each of us spoke about the studied State, trying to give ideas to the classmates to help them understand, thanks to a photo, which country it was.

Then we drew the outline of Africa with a thread on the wall and recomposed, as in a puzzle, all the States of the continent.

The project was very beautiful and interesting.

We have learned that is good to be different but it is important to have the same rights.
